

## "CuppyBar" website template

Created: 29/05/2011

By: Virtuti-D

Email: [virtuti@virtuti.info](mailto:virtuti@virtuti.info)

Thank you for purchasing my theme. If you have any questions that are beyond the scope of this help file, please feel free to email via my user page contact form [here](#). Thanks so much!

### Table of Contents

1. HTML structure
2. CSS structure
3. Javascript
4. PSD
5. Typefaces
6. Images
7. Photo sizes
8. Internet Explorer support
9. Credits

### Includes:

1. 11 HTML files (5 files with sub pages)
2. CSS files + fancybox CSS file + HTML5 reset CSS files
3. 8 js files + fancybox
4. Images folder (photos are not included)

## 1) HTML Structure

HTML5 Doctype. The theme is a fixed layout with 1 column + navigation. Part of pages has fixed-height layout (with sub pages). Part of pages has non-fixed height layout. You can use either all fixed-height pages or non-fixed ones or combine them in a manner as it used for this template. Structure of pages differs. All of the information within the main content area for Home Page is nested within a section with an id of "frontpage".

```
<section id="frontpage">
  <article>
    <h1>The atmosphere of <span
    class="coloured">luxury.</span> The spirit of <span
    class="coloured">delight.</span></h1>
    <p>Pellentesque habitant morbi tristique senectus et
    netus et malesuada fames ac turpis egestas. Vestibulum tortor quam,
    feugiat vitae, ultricies eget, tempor sit amet, ante. Donec eu libero
    sit amet quam egestas semper. Aenean ultricies mi vitae est. Mauris
    placerat eleifend leo. Aenean ultricies mi vitae est. Mauris placerat
    eleifend leo. </p>
```

```
    </article>
</section><!--frontpage ends here-->
```

All of the information within the main content area for A La Carte Page, About Us Page, Contact Page, Gallery Page, Service Page is nested within a div with an id of "main-content-index".

```
<div id="main-content-index">
<div id="colours">
  <span class="color color-1"></span>
  <span class="color color-2"></span>
  <span class="color color-3"></span>
  <span class="color color-4"></span>
  <span class="color color-5"></span>
</div><!--colours ends here-->

<div id="hero-slider">
  <ul>
<li><a href="#" rel="#panel-1" class="active">The story of
CuppyBar</a></li>
<li><a href="#" rel="#panel-2" class="active">The philosophy</a></li>
<li><a href="#" rel="#panel-3" class="active">Our staff</a></li>
<li><a href="#" rel="#panel-4" class="active">CuppyBar Interior</a></li>
<li><a href="#" rel="#panel-5" class="active">Testimonials</a></li>
  </ul>
  <div class="mask">
    <div class="slider-body">
      <div class="panel" id="panel-1">
      .....</div><!--main-content-index ends here-->
```

All of the information within the main content area for Additional Page, Additional2 Page, and Additional3 Page is nested within a div with an id of "main-content-index-additional".

```
<div id="main-content-index-additional">
  <div id="colours">
    <span class="color color-1"></span>
    <span class="color color-2"></span>
    <span class="color color-3"></span>
    <span class="color color-4"></span>
    <span class="color color-5"></span>
  </div><!--colours ends here-->
  <div id="normal">
    <div id="additional-nav">
      <ul>
```

```

<li><a href="#" class="active">Interview with the chief</a></li>
<li><a href="#">Interview with the founder</a></li>
</ul>
</div><!--additional-nav ends here-->

<div class="panel">
    <section class="panelinfo">
        <h2>Interview with the Chief</h2>
        <figure class="right"></figure>
    <div><!--main-content-index-additional ends here-->

```

### Important Note:

Pages with fixed height have sub links which are hidden by mask and activated by jQuery script. You may add as many top sub links as room allows. Note that height of content should be equal to height of mask. If you will change height (currently it is set to 381px .panel, .mask) of the panel do not forget to change height of the mask. Respectively you should change the height of the whole block which is currently set to 540px.

### Navigation:

There are 3 types of navigation: Bottom navigation (for Home page only), Side navigation (for rest of pages) and sub navigation for sub pages (pages with fixed height layout). To customize navigations find (for home page) this piece of code:

```

<div class="panelblock">
    <nav id="slide-nav">
        <a href="menu.html">a la carte | </a>
        <a href="about.html">about us | </a>
        <a href="location.html">location | </a>
        <a href="contact.html">contact | </a>
        <a href="service.html">services | </a>
        <a href="gallery.html">gallery</a>
    </nav>
</div><!--panelblock ends here-->

```

### For other pages:

```

<nav id="side">
    <a href="index.html">home</a>
    <a href="menu.html">a la carte</a>
    <a href="#">about us</a>

```

```

<a href="location.html">location</a>
<a href="contact.html">contact</a>
<a href="service.html">services</a>
<a href="gallery.html">gallery</a>
</nav>

```

And for sub navigation for pages with fixed height this piece of code:

```

<ul>
<li><a href="#" rel="#panel-1" class="active">The story of
cuppyBar</a></li>
<li><a href="#" rel="#panel-2" class="active">The philosophy</a></li>
<li><a href="#" rel="#panel-3" class="active">Our staff</a></li>
<li><a href="#" rel="#panel-4" class="active">CuppyBar Interior</a></li>
<li><a href="#" rel="#panel-5" class="active">Testimonials</a></li>
</ul>

```

Customizing Location Page (Google Maps) see screencast:

<http://www.screencast.com/t/5D0z0fyjNVy>

Customizing Contact Form on Contact Page see screencast:

<http://www.screencast.com/t/wiP05U1yF>

## 2) CSS files Structure

There are 2 CSS files included: main and Internet Explorer specific. + a folder with a reset of CSS styles.

Main CSS file begins with general styles, wrappers, navigation styles and specific styles for each page. Scroll down to find a part you need to customize. Each part of styles is entitled in next manner:

```

/*
-----
--  GENERAL
-----
*/
code is here

/*
-----
--  WRAPPERS
-----
*/

```

```
code is here
```

```
/*
```

```
-----  
-- NAVIGATION  
----- */
```

```
code is here
```

If you want to edit any style, first find corresponding id or class in HTML file, then edit it in CSS file. Do not forget to edit same id or class style in ie.specific (if required).

### 3) Javascript Structure

Folder includes 8 plugins + 1 in “Fancybox” folder 9for customization of image gallery and modal windows). No need to add jQuery file as it is linked:

```
<script  
src="http://ajax.googleapis.com/ajax/libs/jquery/1.4.2/jquery.min.js"></script>
```

To customize jQuery plugins features scroll down and find under “scripts” the code which you can edit as you wish.

### 4) PSD

Photoshop files are not included. Template is CSS based, no PSD mock-ups were involved.

### 5) Typefaces

Template uses custom fonts from Google Font Directory: Oswald, Michroma, Waiting For The Sunrise. You can replace these fonts with other ones if you wish.

### 6) Images and photos

All photos are not included into folder. Your own photos should be added. All buttons, arrows, backgrounds etc are included into “images” folder.

### 7) Photos sizes

As photos are not included into folder here is the list of sizes:

Home page:

bg1.jpg, bg2.jpg-1920 px x 1080 px (or 1200 px)

A La Carte page

- a) cinnamon.jpg-800 px x 640 px (you can set any size you wish though)
- b) cake.jpg (Sweets sub page, modal window)-300 px x 300 px

About Us page:

- a) staff.jpg (Our Staff sub page)-710 px x 326 px
- b) 1.jpg (Our Staff sub page, sliding out window)-400 px x 200 px
- c) 2.jpg (Our Staff sub page, sliding out window)-300 px x 80 px
- d) 3.jpg (Our Staff sub page, sliding out window)-400 px x 140 px
- e) interior.jpg (CuppyBar Interior sub page)-710 px x 240 px

Location page:

outside.jpg-400 px x 260 px

Gallery page:

gallery-pic1-small.jpg, gallery-pic2-small.jpg-139 px x 120 px (keep these dimensions)

gallery-pic1-big.jpg, gallery-pic2-big.jpg-800 px x 600 px

Additional page:

chief.jpg-289 px x 358 px (you can change these dimensions)

Additional 2 page:

cinnamon-small.jpg-300px x 240 px

Additional 3 page:

timeline1.jpg, timeline2.jpg, timeline3.jpg-600 px x 420 px

## 8) Internet Explorer support

Internet Explorer is known for its terrible support of Unicode symbols, CSS3, floats, positions and more. It is impossible to give same look to template in Internet Explorer if almost all CSS3 properties are not replaced with images. Although, specific ie.css file is included which fixes several bugs on current template. As most of colours of buttons, images, logo etc would be changed according your needs, there was no sense to create replacing images in Photoshop. But once you will need the website looking in IE similar to how it looks in all other normal browsers, you will need to create appropriate images and place them as fall-back into ie.css file. Internet Explorer browser also renders poorly fonts, sliders and other jQuery powered elements.

## 9) Credits

Icons are taken from here: <http://webtreats.mysitemyway.com/1540-infocu-social-media-icon-mega-set/>

Once again, thank you so much for purchasing this theme. As I said at the beginning, I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on ThemeForest, you might consider visiting the forums and asking your question in the "Item Discussion" section.
